

Recovery Record

An eating disorder management app free to Optum providers and members

OPTUM[®]

Introducing Recovery Record

Recovery Record changes the model of eating disorder care delivery by automating best practices for quality improvement; facilitating between-appointment check-ins and in app patient-provider interactions; and enabling continuous transparency into patient progress data for proactive and preventive treatment

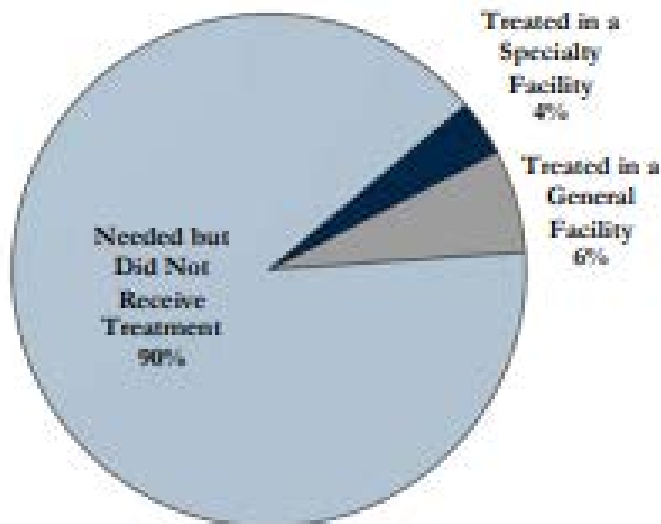

Current Eating Disorder Landscape

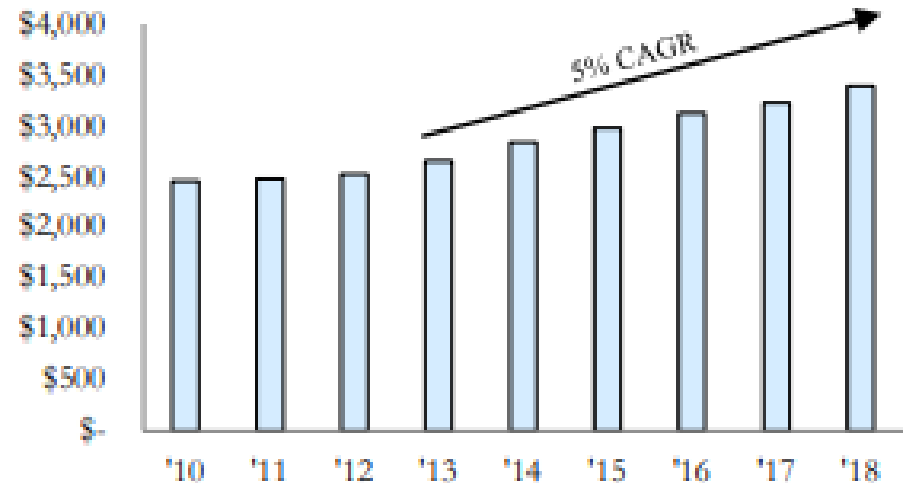

According to data from the National Association of Anorexia Nervosa and Associated Disorders (ANAD), an estimated 30.0 million individuals in the United States suffer from an eating disorder.

- According to ANAD data, only one in 10 individuals with eating disorders actually receives treatment.
- Many public and private health insurers limit their coverage of eating disorders.

Eating Disorder Treatment Gap

2010-2018 Industry Growth (*\$ in millions*)
