

Important Platinum Program Update

As we move forward with the revitalization of the Platinum Program for Behavioral Health services, the following changes will be deployed in 2023

- Our national quality (readmission and follow up) benchmarks will move to a regional structure
- Our SUD diagnostic categories will be collapsed into one category
- The new HEDIS FUI metric (Follow-up After High Intensity Care) will be applied to SUD programs

Your data reports will continue to be available on Provider Express so that all facilities are able to monitor and track progress.
